- 2 x Dryconn Black/Gray cable connectors

Part Number: RC24

reCOIL RC24 Technical Information

- Power 24VAC
- Inrush Current 250mA
- Holding Current 130mA

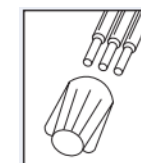

How To Replace An Irrigation Solenoid

1. **TURN OFF** – Ensure the water and power supply are isolated
2. **REMOVE** - Unscrew the faulty solenoid coil
3. **REPLACE** – Select the correct adaptor and crew in the new
4. **reCOIL** solenoid.
5. **RECONNECT** - Connect the wires using the connectors supplied, one wire to the common cable and one to the valve station cable.

How To use Dryconn Cable Connectors

1. Ensure the power is disconnected.
 2. Strip wires to 10mm.
 3. Align any frayed strands or conductors.
 4. Pre-twisting unnecessary. Place stripped wires together with ends of insulation even.
 5. Twist connector onto wires pushing firmly until hand-tight. Do not over tighten.
 6. Wipe sealant in and around conductors and connector opening while tightening.
- Do not reuse connector.
